Summary

I am a full stack JavaScript developer with Project Management and QA experience in Information Technology. I am looking for an innovative and collaborative environment that focuses on creative solutions. Providing exceptional customer satisfaction while striving for efficiency is a main objective of my career.

CAREER STORY

At the heart, I am a developer and love the challenge of building and creating new applications and resolving technical issues. After a few years of being a program/project manager, I decided to move back into being a developer. The time as a project manager allowed me to cultivate my skills in strategic and tactical thinking.

TECHNOLOGIES & TOOLS: AWS Cloud, Node.js, MongoDB (NoSQL), Express, SQL Databases, Linux, RESTful, BootstrapJS, JIRA, TFS, GitHub, Cloud9 IDE

KEY ACCOMPLISHMENTS:

- Introduced and oversaw a software configuration change that allowed the use of MS SQL Standard Edition vs. MS SQL Enterprise Edition, resulting in annual savings of \$84,000 in licensing fees.
- Improved the technical workflow between a telephone system and in-house computer ordering system, which alleviated the need to purchase a telephony software system.
- Spearheaded the adoption of Team Foundation Server to support the agile methodology; prior to this the PMO department did not use TFS to manage projects.
- Certified Scrum Master (CSM) from the Scrum Alliance.
- Certified Project Manager Professional (PMP) from the Project Management Institute.

PROFESSIONAL EXPERIENCE:

FULL STACK DEVELOPER

Student: [Udemy: The Web Developer Bootcamp](#) (July, 16 – Nov, 16)

- TonyLanera.com: This site and subsites are built on the AWS platform: Route53 for Domain Management, EC2 for Computing.
- [YelpCamp](#): This is a full stack application built on Node.js, Express and MongoDB. Responsive nature and styling is done with Bootstrap. RESTful Routing has been implemented by using Method-Override. This site allows for user to create a login and generate content with comments. AWS SES is used for password reset.
- [The Color Game](#): This site is developed in HTML5, CSS3 and JavaScript. The goal of the exercise was to gain understanding and practice utilizing the DOM and JavaScript.
- [KeyboardPlay](#): This site displays circles in random locations and plays a corresponding sound when pressing any key between "a" and "z". This site uses paperJS for graphics and animation and howler.js for sound play. This site is a variation of the patatap.com.

BUSINESS APPLICATION PROGRAMMER

WORLD VISION – FEDERAL WAY, WA. (1997 – 2002)

- Enhanced and maintained custom built in-house business software systems written in Powerbuilder/Informix and C.
- Collaborated with clients on developing a program to streamline data calculations within a statistical analysis tool.
- Wrote Oracle PL/SQL procedures to transfer data from AS400 to Oracle/Unix platform
- Improved the process of pulling donor information from a Donor Management system for importing into a Marketing Campaign Management Tool.
- Provided an in-depth technical view of deployment software, which helped direct upper management on the best use of resource allocation.
- Established competitive bidding relationship with various training vendors to provide in-house ESSBASE software training.

TONY LANERA, CSM

PROFESSIONAL EXPERIENCE: (cont'd)

PROGRAMMER ANALYST

WALT DISNEY Co. – BURBANK, CA. (1993 – 1997)

- Identified HR security interface encryption flaw, and researched, purchased and integrated encryption software, removing any security vulnerability.
- Designed, developed, implemented and maintained custom-built software systems written in FoxPro and Powerbuilder/Sybase.
- Maintained and enhanced class libraries, and created an automated technical documentation tool in FoxPro.
- Performed various DevOps duties: Migrated databases from Sybase 10 to 11. Created Unix scripts for scheduled (CRON) jobs, Shutdown and Restart Procedures, and various admin duties.
- Developed quality assurance procedure for moving new systems and enhancements into production.
- Provided management and technical direction to contractors.

PROGRAM MANAGER

LIMELIGHT NETWORKS – SEATTLE, WA. (Sept, 14 – Nov, 15)

- Program Manager for the next generation of Orchestrate Live Video Product.
- Oversaw hardware deployment, which supported the Orchestrate Live Video Product.
- Managed the complete program life cycle process which included scope development, budget, execution, deployment and final closure.
- Led executive level milestone meetings which included key stakeholders.
- Led Engineering and Product Management team in determining project priorities.
- As Program Manager was the primary point person for all cross-functional teams: Engineering, Product Management, Dev/Ops, Operations, and Marketing.
- Developed and Managed Budget in excess of \$400k.
- Provided valuable input to the PMO (Program Management Office) team regarding executive level reporting.
- Led the decommissioning team for deprecating various old Limelight Products.
- Worked and led cross-functional globally dispersed teams to successfully implement Internet Protocol Version 6.

PROJECT MANAGER

FILTER LLC – SEATTLE, WA. (June, 13 – Aug, 14)

- Managed a project portfolio totaling over \$500k in budget, which encompassed the entire project cycle from Statement of Work (SOW) to final delivery.
 - Responsible for generating requirements and testing documents as defined by the SOW.
 - Delivered high-quality, responsive websites for key customers all under budget and within the customer's time frame.
 - Hired and managed a team of designers, production artists, HTML5 and iOS developers to deliver Web and mobile apps for Cisco C-Level executive presentations.
 - Developed an excellent rapport with an existing client, HGTV Home, in order to quickly ascertain their needs on a site redesign. This rapport provided a collaborative environment with the client, resulting in rapid implementation of the client's vision for the site.
 - Instituted a standard test planning methodology that reduced project effort and improved client confidence.
-

PROFESSIONAL EXPERIENCE: (cont'd)

AGILE PROJECT MANAGER

INVISIO CORP – BELLEVUE, WA. (Oct, 12 – April, 13)

- Provided a "best in practice" solution for implementing a Windows 8 App layout, which translated directly into identifying key tasks, schedule and coordination efforts between teams.
- Effectively drove teams to provide concrete project estimates in a timely manner while simultaneously improving the estimation process at a project level.
- Led a team through the complete Agile Lifecycle: Product backlog creation; Sprint Planning; Daily Standup; Sprint Review and Sprint Retrospective.
- Led PMO Team to define policies and guidelines for using Microsoft Team Foundation Server (TFS) in the adoption of Agile Methodology.
- Created and taught a series of Microsoft Team Foundation Server (TFS) classes to support the implementation of Agile Methodology across the division.

PROJECT MANAGER / SOLUTION ANALYSIS

PATH (ROBERT HALF) – SEATTLE, WA. (Sept, 1 – Feb, 12)

- Gathered and defined business requirements for an International Time and Vacation tracking system to support PATH field office.
- Performed landscape analysis for the purpose determining a Salesforce.com implementation partner, which enabled upper management to make informed decision.
- Developed migration and integration strategies and SQL scripts that streamlined data processing between legacy systems and Salesforce.com.
- Implemented key business functionality within Salesforce.com which enabled better contract management.

PROJECT MANAGER

RUSSELL INVESTMENTS (CONTRACT THROUGH TCS) – SEATTLE, WA. (JAN, 11 – SEP, 11)

- See LinkedIn Profile for details

PROGRAM MANAGER

VERTAFORE INC – BOTHELL, WA. (2007 – 2009)

- See LinkedIn Profile for details

PROGRAM MANAGER & SOFTWARE QUALITY ENGINEER

GETTY IMAGES – SEATTLE, WA. (2004 – 2007)
