Summary

Tony Lanera is a full stack JavaScript developer with Project Management and QA experience in Information Technology. He is highly innovative and able to quickly understand complex systems and unique technologies. His continual focus and ultimate end-goal of providing exceptional customer satisfaction while striving for efficiencies is a main objective of his career.

DEVELOPER EXPERIENCE

After ten years of being a program/project manager, I decided to move back into being a developer. At heart, I am a developer and love the challenge of building and creating new application and resolving technical issues. The time as a project manager, allowed me develop the skills of thinking tactically and strategically.

TECHNOLOGIES & TOOLS: AWS Cloud, Node.js, MongoDB, Express, SQL Databases, Linux, BootstrapJS, JIRA, TFS, GitHub

KEY ACCOMPLISHMENTS:

- Completion of [Udemy: The Web Developer Bootcamp](#) - course
- Certified Project Manager Professional (PMP) from the Project Management Institute.
- Certified Scrum Master (CSM) from the Scrum Alliance.
- Spear headed the adoption of Team Foundation Server to support the agile methodology; prior to this the PMO department did not use TFS to manage projects.
- Introduced and oversaw a software configuration change that allowed the software product to use MS SQL Standard Edition vs. MS SQL Enterprise Edition, resulting in a yearly savings of \$84,000 in licensing fees.
- Increased the e-commerce readiness of new product lines by 125%, decreased the effort of development and QA teams, and documented the reusable process.
- Improved the business and technical process flow between a telephone system and in-house computer ordering system, which alleviated the need to purchase a telephony software system.

PROFESSIONAL EXPERIENCE:

FULL STACK DEVELOPER

Student: [Udemy: The Web Developer Bootcamp](#)

- [TonyLanera.com](#): This site and subsites are built on the AWS platform: Route53 for Domain Management, EC2 for Computing.
- [YelpCamp](#): This is a full stack application built on Node.js, Express and MongoDB. Responsive nature and styling is done with Bootstrap. RESTful Routing has been implemented by using Method-Override. This site allows for user to create a login and generate content with comments. AWS SES is used for password reset.
- [The Color Game](#): This is my first site developing with HTML5, CSS3 and JavaScript. The goal of this exercise is to gain understanding and practice utilizing the DOM and JavaScript.
- [KeyBoardPlay](#): This site displays circles in random location and plays a corresponding sound when pressing any key between "a" through "z". This site uses paperJS for graphics and animation and howler.js for sound play. This site is a variation of the [patatap.com](#).

BUSINESS APPLICATION PROGRAMMER

WORLD VISION – FEDERAL WAY, WA. 1997 - 2002

- Improved the process of pulling donor information from a Donor Management system for importing into a Marketing Campaign Management Tool.
- Collaborate with clients on developing a program to streamline \ data calculations within a statistical analysis tool.
- Provided an in-depth technical view of deployment software, which helped direct upper management on the best use of resource allocation.
- Enhanced database software systems by analyzing business processes in writing system requirements and technical specifications.
- Standardized companywide procedure of deploying software packages.

TONY LANERA, CSM

PROFESSIONAL EXPERIENCE: (cont'd)

PROGRAMMER ANALYST

WALT DISNEY COMPANY – BURBANK, CA 1993 - 1997

- Identified HR security interface encryption flaw, and researched, purchased and integrated encryption software, removing any security vulnerability.
- Designed, developed, implemented and maintained custom built software systems written in FoxPro and Powerbuilder/Sybase.
- Maintained and enhanced class libraries, and created an automated technical documentation tool in FoxPro.

PROGRAM MANAGER

LIMELIGHT NETWORKS – SEATTLE, WA. (Sept 2014 – Nov 2015)

- Program Manager for the next generation of Orchestrate Live Video Product.
- Oversaw hardware deployment, which supported the Orchestrate Live Video Product.
- Managed the complete program life cycle process which included, scope development, budget, execution, deployment and final closure.
- Led executive level milestones meetings which included key stakeholders.
- Led Engineering and Product Managements team in determining project priorities.
- As Program Manager was the primary point person for all cross-functional teams: Engineering, Product Management, Dev/Ops, Operations, and Marketing.
