SUMMARY

I am a Front End JavaScript developer with Project Management and QA experience. I thrive in an innovative and collaborative environment that focuses on creative solutions. Providing exceptional customer satisfaction and striving for process improvement is a main objective of my career.

At the heart, I am a developer. I enjoy the challenge and creativity that is involved with building new applications and resolving technical issues. My experience, originally as a developer, then as a PM and now full circle back to being a developer, has given me a unique exposure and understanding of both roles. This understanding has highlighted the importance of collaboration, business focus and process improvements.

TECHNOLOGIES & TOOLS

AWS Cloud, Node.js, MS SQL Database, MongoDB (NoSQL), Linux (Ubuntu), HTML5, CSS3, JavaScript, Express, JIRA, TFS, GitHub, Cloud9 IDE, RESTful

KEY ACCOMPLISHMENTS:

- Introduced and oversaw a software configuration change that allowed the software product to use MS SQL Standard Edition vs. MS SQL Enterprise Edition, resulting in a yearly savings of \$84,000 in licensing fees.
- Improved the technical workflow between a telephone system and in-house computer ordering system, which alleviated the need to purchase a telephony software system.
- Spearheaded the adoption of Team Foundation Server to support the agile methodology; prior to this the PMO department did not use TFS to manage projects.
- Certified Scrum Master (CSM) from the Scrum Alliance.

PROFESSIONAL EXPERIENCE:

DEVELOPMENT EXPERIENCE:

Developer (Internship)	CoolBlueWeb.com – Seattle, Wa	Feb, 2017 – March 2017
<ul style="list-style-type: none">▪ Developing a boiler plate LAMP (Linux, Apache2, MySQL, PHP) image with security within the BlueOcean cloud environment. This allowed developers to quickly standup an environment without the need of performing software install and additional configuration.▪ Performed a needs analysis of the BlueOcean Cloud Environment. Implemented a 20% cost savings based on the analysis		
Full Stack Developer	Student: Udemy: The Web Developer Bootcamp	July, 2016 – Nov, 2016
<ul style="list-style-type: none">▪ TonyLanera.com: The site and subsites are built on the AWS platform: Route53 and EC2▪ YelpCamp: Is a full stack application built on Node.js, Express and MongoDB. Responsive nature and styling is done with Bootstrap. RESTful Routing was implemented using Method-Override. AWS SES is used for password reset. This site allows for user to create a login and generate content with comments.▪ The Color Game: This site is developed in HTML5, CSS3 and JavaScript. The goal of the exercise was to gain understanding and practice utilizing the DOM and JavaScript.▪ KeyboardPlay: This site displays circles in random locations and plays a corresponding sound when pressing any key between "a" to "z". This site uses paperJS for graphics and animation and howler.js for sound play. This site is a variation of the patatap.com.		
Business Application Programmer	World Vision – Federal Way, WA	July, 1997 – March, 2002
<ul style="list-style-type: none">▪ Enhanced and maintained custom-built software systems written in Powerbuilder/Informix and C.▪ Wrote Oracle PL/SQL stored procedures to transfer data from AS400 Mainframe to Oracle/Unix platform.▪ Built an automated tool to pull data from a Donor Management system into a Campaign Management Tool.▪ Established competitive bidding relationship with various training vendors to provide in-house ESSBASE software training.		
Programmer Analyst	Walt Disney Co. – Burbank, CA	June, 1993 – July, 1997
<ul style="list-style-type: none">▪ Identified HR security interface encryption flaw, and researched, purchased and integrated encryption software, removing any security vulnerability.▪ Designed, developed, implemented and maintained custom-built software systems written in FoxPro and Powerbuilder/Sybase.▪ Maintained and enhanced class libraries, and created an automated technical documentation tool in FoxPro.▪ Performed various DevOps duties: Migrated databases from Sybase 10 to 11; Created Unix scripts for scheduled (CRON) jobs, Shutdown and Restart Procedures; various admin duties.▪ Developed quality assurance procedure for moving new systems and enhancements into production.▪ Provided management and technical direction to contractors.
