TONY LANERA, CSM

tony@tonylanera.com   Cell: 206-930-0758   TonyLanera.com

Summary

I am a full stack JavaScript developer with Project Management and QA experience in Information Technology. I am looking for an innovative and collaborative environment that focuses on creative solutions. Providing exceptional customer satisfaction while striving for efficiencies is a main objective of my career.

DEVELOPER EXPERIENCE

After ten years of being a program/project manager, I decided to move back into being a developer. At heart, I am a developer and love the challenge of building and creating new applications and resolving technical issues. The time as a project manager allowed me to cultivate my skills in strategic and tactical thinking.

TECHNOLOGIES & TOOLS: AWS Cloud, Node.js, MongoDB, Express, SQL Databases, Linux, BootstrapJS, JIRA, TFS, GitHub

KEY ACCOMPLISHMENTS:

- Completion of Udemy: The Web Developer Bootcamp - course
- Certified Project Manager Professional (PMP) from the Project Management Institute.
- Certified Scrum Master (CSM) from the Scrum Alliance.
- Spearheaded the adoption of Team Foundation Server to support the agile methodology; prior to this the PMO department did not use TFS to manage projects.
- Introduced and oversaw a software configuration change that allowed the software product to use MS SQL Standard Edition vs. MS SQL Enterprise Edition, resulting in a yearly savings of $84,000 in licensing fees.
- Increased the e-commerce readiness of new product lines by 125%, decreased the effort of development and QA teams, and documented the reusable process.
- Improved the business and technical process flow between a telephone system and in-house computer ordering system, which alleviated the need to purchase a telephony software system.

PROFESSIONAL EXPERIENCE:

FULL STACK DEVELOPER

Student: Udemy: The Web Developer Bootcamp

- TonyLanera.com: This site and subsites are built on the AWS platform: Route53 for Domain Management, EC2 for Computing.
- YelpCamp: This is a full stack application built on Node.js, Express and MongoDB. Responsive nature and styling is done with Bootstrap. RESTful Routing has been implemented by using Method-Override. This site allows for user to create a login and generate content with comments. AWS SES is used for password reset.
- The Color Game: This is my first site developing with HTML5, CSS3 and JavaScript. The goal of this exercise is to gain understanding and practice utilizing the DOM and JavaScript.
- KeyBoardPlay: This site displays circles in random location and plays a corresponding sound when pressing any key between "a" through "z".This sites uses paperJS for graphics and animation and howler.js for sound play. This site is a variation of the patatap.com.

BUSINESS APPLICATION PROGRAMMER

WORLD VISION – FEDERAL WAY, WA. 1997 - 2002

- Improved the process of pulling donor information from a Donor Management system for importing into a Marketing Campaign Management Tool.
- Collaborate with clients on developing a program to streamline \\ data calculations within a statistical analysis tool.
- Provided an in-depth technical view of deployment software, which helped direct upper management on the best use of resource allocation.
- Enhanced database software systems by analyzing business processes in writing system requirements and technical specifications.
- Standardized companywide procedure of deploying software packages.

PROGRAMMER ANALYST

WALT DISNEY COMPANY – BURBANK, CA 1993 - 1997

- Identified HR security interface encryption flaw, and researched, purchased and integrated encryption software, removing any security vulnerability.
- Designed, developed, implemented and maintained custom built software systems written in FoxPro and Powerbuilder/Sybase.
- Maintained and enhanced class libraries, and created an automated technical documentation tool in FoxPro.

PROGRAM MANAGER

LIMELIGHT NETWORKS – SEATTLE, WA. (Sept 2014 – Nov 2015)

- Program Manager for the next generation of Orchestrate Live Video Product.
- Oversaw hardware deployment, which supported the Orchestrate Live Video Product.
- Managed the complete program life cycle process which included, scope development, budget, execution, deployment and final closure.
- Led executive level milestones meetings which included key stakeholders.
- Led Engineering and Product Managements team in determining project priorities.
- As Program Manager was the primary point person for all cross-functional teams: Engineering, Product Management, Dev/Ops, Operations, and Marketing.
- Developed and Managed Budget in excess of $400k.
- Provided valuable input to the PMO team regarding executive level reporting.
- Led the decommissioning team for deprecating various old Limelight Products.
- Worked and led cross-functional globally dispersed teams to successful implement Internet Protocol Version 6.

PROJECT MANAGER

FILTER LLC – SEATTLE, WA. (June 2013 - Aug 2014)

- Managed a project portfolio totaling over $500k in budget, which encompassed the entire project cycle from Statement of Work (SOW) to final delivery.
- Responsible for generating requirements and testing documents as defined by the SOW.
- Delivered high-quality, responsive websites for key customers all under budget and within the customer's time frame.
- Hired and managed a team of designers, production artists, HTML 5 and iOS developers to deliver Web and mobile apps for Cisco C-Level executive presentations.
- Developed an excellent rapport with an existing client, HGTV Home, in order to quickly ascertain their needs on a site redesign. This rapport provided a collaborative environment with the client, resulting in quickly implementing of the client's vision for the site.
- Instituted a standard test planning methodologies that reduced project effort and improved client confidence.

AGILE PROJECT MANAGER

INVISO CORP – BELLEVUE, WA (Oct, 2012 – April, 2013)

- Provided a "best in practice" solution for implementing a Windows 8 App layout, which translated directly into identifying key tasks, schedule and coordination efforts between teams.
- Effectively drove teams to provide concrete project estimates in a timely manner while simultaneously improving the estimation process at a project level.
- Led a team through the complete Agile Lifecycle: Product backlog creation; Sprint Planning; Daily Standup; Sprint Review and Sprint Retrospective.
- Led PMO Team to define policies and guidelines for using Microsoft Team Foundation Server (TFS) in the adoption of Agile Methodology.
- Created and taught a series of Microsoft Team Foundation Server (TFS) classes to support the implementation of Agile Methodology across the division.

PROJECT MANAGER / SOLUTION ANALYSIS
PATH (CONTRACT THROUGH ROBERT HALF) – SEATTLE, WA (Sept, 2011 – Feb, 2012)
- Gathered and defined business requirements for an International Time and Vacation tracking system to support PATH field office.
- Performed landscape analysis for the purpose determining a SalesForce implementation partner, which enabled upper management to make informed decision.
- Developed migration and integration strategies and SQL scripts that streamlined data processing between legacy systems and SalesForce.com.
- Implemented key business functionality within SalesForce.com which enable better contract management.
